Mit der Bahn / By train

Schloß Holte ist während der Tageszeit stündlich mit der Bahn über die IC Bahnhöfe Bielefeld und Paderborn zu erreichen. Bitte teilen Sie uns Ihre Ankunftszeit in Schloß Holte mit, wir holen Sie dann ab.

You can reach Schloss Holte during the daytime by train hourly from the Intercity-Stations Bielefeld and Paderborn. Please let us know your arrival time in Schloss Holte and we will arrange to have you picked up.

Mit dem Flugzeug / By plane

Sie erreichen den Flughafen Paderborn regelmäßig über Frankfurt und München. Wir holen Sie gerne ab, bitte teilen Sie uns die Ankunftszeit vor Ihrer Abreise mit.

You can fly directly to Paderborn Airport from Frankfurt and Munich. We would be glad to pick you up from there which is only a 15-minute drive from TGK.

Die Gläser der Glashütte SPECTRUM zeichnen sich durch eine sehr konstante Qualität, große Farbtreue und sehr gute Schneidbarkeit aus. Die Produktpalette deckt nahezu alle Bereiche der Glasgestaltung ab. Die opalen und halbtransparenten Gläser werden überwiegend im modernen Lampen- und Objektbau verwendet. Für den Bereich Türen- und Fensterbau eignen sich besonders die Kathedralgläser, die in verschiedenen Oberflächenstrukturen lieferbar sind. Die Barockgläser und Seedy farblos bieten wir neben dem Standardmaß zusätzlich optimiert für Tür-Lichtauschnitte in ca. 150 x 60 cm an (SL).

NEU von SPECTRUM sind die für die Glasverschmelzung hervorragend geeigneten mit SF gekennzeichneten Gläser im System 96 (AK 96). Alle Produkte im System 96™ sind auf Kompatibilität getestet (tested compatible). Das System 96 bietet zu dem klaren Basisglas 100 SF eine große Auswahl an farbigen Gläsern. Die Fa. Uroboros liefert im System 96 Glaskrösel in fünf verschiedenen Körnungen, Glasfäden und Glasnudeln.

The glass from SPECTRUM distinguishes itself by a very constant quality, reliable color fidelity and superior ease of cutting. The product line covers almost all areas of glass design. The opal and semi-translucent glasses are mainly employed in modern lamp and object creation. The many different surface structures available in the Cathedral glass as well as in Baroque™ glass are best suited for the areas of door and window design. In addition to the standard sheets we offer SPECTRUM Baroque and clear Seedy in sheets approx. 150 x 60 cm, (SL) optimized for door inserts. NEW from SPECTRUM is the line of fusible glass sheets labeled "Tested Compatible" in the new System 96™ (96 TEC). All System 96™ products are constantly tested for compatibility. The new System 96™ offers - in addition to the 100SFS clear base glass - a large selection of colored glass. In cooperation with SPECTRUM, Uroboros Glass Studios offers a program of System 96™ glass frits in five grain sizes, glass stringers and noodles.

Die Gläser der Glashütte ARMSTRONG zeichnen sich durch eine besonders filigrane Mischung der verschiedenen Farben aus. Häufige, unkonventionelle Mehrfachkombinationen von Mustern und Farben beflügeln die Phantasie des Glaskünstlers.

Glass from ARMSTRONG GLASS COMPANY is typified by an especially delicate mixture of the various colors. Unconventional multi-colored mixes inspire the imagination of the glass artisan.

FLACHGLAS / FLAT GLASS

71 999 00 Armstrong Musterkasten Standard / Armstrong Sample Set Standard

UROBOROS-Glas wird Scheibe für Scheibe handgerührt und handgewalzt. Die Vielfalt der Farbkombinationen und Oberflächenstrukturen macht dieses Glas unersetzlich für den traditionellen Lampen- und Fensterbau im Stile Tiffany's. Bezeichnend für UROBOROS-Glas sind nicht nur die natürlichen Farben, sondern auch die Ausgewogenheit von transparenten und opalen Partien in einer Scheibe. Daraus resultiert die enorme Tiefenwirkung dieses Glases.

Auch für den Bereich Glasverschmelzung (Fusing) bietet UROBOROS eine umfangreiche Palette an einfarbigen, transparenten und opalen Gläsern. Diese Gläser sind hier mit "F" gekennzeichnet.

Neu im Programm ist das SYSTEM96™ (SF). Mit diesem System sind die entsprechenden Gläser (Flachglas, Krösel, Stringer etc.) von UROBOROS und SPECTRUM untereinander mischbar.

UROBOROS glass is hand mixed and rolled sheet by sheet. The diversity of color combinations and surface textures makes this glass indispensable for the construction of traditional lampshades and windows in the style of Tiffany. Typical for UROBOROS glass is not only the natural colors but also the balance of transparent and opalescent glass for the field of glass fusing. These glasses are designated by an "F" in this list. New in this range is the Sytem96™ (SF) programm. Using this glass (sheets, frits stringers, etc.) the UROBOROS program can be combined with SPECTRUM glass having the same designation.

Advice: **60-xx-xx** = 3 mm - **61xx-xx** = 1,5 mm

YOUGHIOGHENY-Glas wird nach alter Tradition handgemacht. Es eignet sich vorzüglich für alle Arten von Farbglas-Anwendungen. In Zusammenarbeit mit Paul Crist stellt YOUGHIOGHENY das sogenannte Reproduktionsglas her. Es wird in Anlehnung an berühmte Lampen wie "Laburnum" und "Wisteria" produziert. Außergewöhnlich und wunderschön ist das "Stipple-Glas" (SP) mit seiner leicht milchigen, eisartigen Oberfläche.

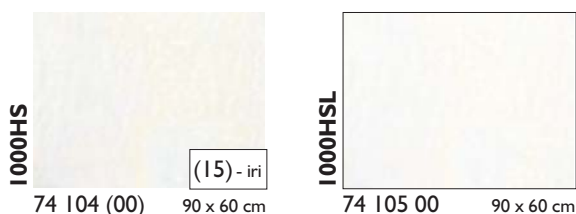

YOUGHIOGHENY glass is hand crafted according to the old tradition. It is eminently suitable for all colored glass applications. In cooperation with Paul Crist YOUGHIOGHENY manufactures so-called reproduction glass. This glass is produced with reference to famous Tiffany lamps such as "Laburnum" and "Wisteria". Unusual and very beautiful is the "Stipple Glass (SP) with its slightly milky, ice-like surface texture.

KOKOMO ist eine der ältesten Opalescent-Glashütten in den USA. Schon Tiffany war Kunde bei KOKOMO. Es gibt einige Farben, die in ihrer Brillanz einmalig und unerreicht sind. Viele Farben sind auch mit verschiedenen Oberflächenstrukturen lieferbar. Sehr umfangreich ist die Palette der transparenten Gläser, die sich sehr gut im Türen- und Fensterbau einsetzen lassen.

KOKOMO is one of the oldest glass manufactures in the U.S.A. Tiffany was originally a customer of KOKOMO'S. This company makes number of colors which are unique unequalled in their brilliance. Many colors are available with several different surface textures. The palette of transparent glass, which is very suitable for use in doors and windows, is also extensive.

WISSMACH-Oberflächenstrukturen / WISSMACH-Textures

WISSMACH stellt eine sehr umfangreiche Palette an Farbgläsern her. Besonders hervorzuheben ist die große Auswahl an Kathedralgläsern.

WISSMACH manufactures a very wide range of colored glass. Special emphasis should be given to the great selection of cathedral glass.

BULLSEYE

GLASS CO.

BULLSEYE Glas ist hervorragend für Fusing-Arbeiten geeignet. Das überaus reichhaltige Angebot an Farben, Strukturen und Glasstärken eröffnet jedem Fuser vielfältige Gestaltungsmöglichkeiten. Viele BULLSEYE Farben sind zudem nicht nur als Flachglas erhältlich, sondern zusätzlich auch als Krösel, Confettis, Fäden und Puder.

Die kompatiblen BULLSEYE Gläser sind nach Kompatibilitätstests auch mit den Gläsern von UROBOROS und ARTISTA mischbar.

BULLSEYE Streakies und Mottles sind besonders für den Bau von hochwertigen Lampenschirmen geeignet.

Bullseye glass is outstandingly suitable for fusing purposes. The extremely diverse range of colors, structures and glass thicknesses opens countless design options for every fuser. Moreover, many Bullseye colors are not only available as sheet glass, but additionally as frits, confetti, noodles and powder.

The compatible Bullseye glass has been tested successfully for compatibility with Uroboros and Artista glass.

Bullseye streakies and mottles are exceptionally suitable for the construction of high-quality lampshades.

Die Bezeichnungen "Tested Compatible", AK96, AK90, AK85, AK104 usw. bedeuten nicht die Garantie auf ein perfektes, spannungsfreies Endresultat. Auch beim Einsatz dieser Gläser müssen Sie selber Tests durchführen.

The designations "Tested Compatible", COE96, COE90, COE85, COE104 etc. do not represent a guarantee that your result will be perfect and without stress. Even when working with glass with these designations you must test the glass yourself to insure compatibility of the finished piece.

SCHOTT
glass made of ideas

SCHOTT-ARTISTA

Getestetes Glas für Fusingarbeiten. 25 transparente Farben sind lieferbar. Die Flachgläser sind kompatibel mit weiteren ARTISTA-Produkten (Drops, Krösel usw.) und auch geeignet für große Flächen, z.B. Isolierglas und Verbundsicherheitsglas.

This glass for fusing is tested compatible. 25 transparent colors are available. The sheet glass is also compatible with other ARTISTA-products (drops, frits a.s.o) and it is also suitable for large surfaces, for example in insulating glass and laminated glass applications.

SCHOTT-IMERA

Das Glas zeichnet sich durch eine extrem glatte Oberfläche und gleichmäßige Färbung aus und kann hervorragend für dekorative Verglasungen eingesetzt werden. Es kann auf die verschiedensten Arten bearbeitet werden.

IMERA is a very smooth, body-tinted glass which can be refined by using a variety of techniques. It provides a host of individual designs.

SCHOTT-OPALIKA

Die Weißüberfang-Produktlinie ist in verschiedenen Stärken und Abmessungen erhältlich. Besonders geeignet für Lichtdecken.

White flashed glass in different thicknesses and sizes. Especially suitable for illuminated ceilings.

SCHOTT-RESTOVER, GOETHE, TIKANA

Gläser zur Restaurierung in verschiedenen Stärken und Abmessungen.

Glass for restoration in different thicknesses and sizes.

SCHOTT-SCHWARZGLAS

Das Schwarzglas wird in Dicken bis ca. 8 mm geliefert und eignet sich für Regalböden, sowie als Basisglas für Goldbeschriftungen und viele andere dekorative Gestaltungen.

Schwarzglas is supplied in thicknesses up to 8 mm. It is suitable for shelves, as the basis of gold lettering and for other decorative applications.

SCHOTT-RIVULETTA

Ein hochtransparentes, farbloses Glas mit einseitig verlaufender, feinlinierter Oberfläche. RIVULETTA wird bei Möbel- und Türverglasungen, Raumteilern, Trennwänden sowie Duschabtrennungen eingesetzt.

A clear glass with a surface pattern of finely defined parallel lines. The structure of the glass enhances applications such as furniture, door glazing, room dividers, partition walls and shower doors.

SCHOTT-MIROGARD

Ein beidseitig interferenzoptisch entspiegeltes, vollkommen transparentes Spezialglas. Es ist in verschiedenen Ausführungen lieferbar.

Is a completely transparent special glass with an anti-reflective coating on both surfaces. Available in different specifications.

Die Bezeichnungen "Tested Compatible", AK96, AK90, AK85, AK104 usw. bedeuten nicht die Garantie auf ein perfektes, spannungsfreies Endresultat. Auch beim Einsatz dieser Gläser müssen Sie Tests durchführen.

The designations "Tested Compatible", COE96, COE90, COE85, COE104 etc. do not represent a guarantee that your result will be perfect and without stress. Even when working with glass with these designations you must test the glass yourself to insure compatibility of the finished piece.

ÜBERFANGGLÄSER / FLASHED GLASS

Überfanggläser sind klare Gläser mit einem einseitig aufgetragenen Farbglas. Sie sind die "hohe Kunst" des Glasmachens. Überfanggläser eignen sich besonders für Gravuren und Sandstrahlarbeiten. Auf den Abbildungen sehen Sie die lieferbaren Farben als auch das Resultat nach der Gravur bzw. Schliff.

These Lamberts flashed glasses consist of two glass layers, one colour on clear glass.

Flashed glasses suit especially for engraving and sandblasting. The pictures show the available colours and the result after engraving / grinding.

Die Glashütte Lamberts fertigt seit mehr als 70 Jahren nach traditionellen Glasmachermethoden Gläser mit einer einzigartigen Vielfalt, Qualität und Brillanz.

Die Produktpalette reicht von mundgeblasenem Echt-Antikglas in verschiedenen Farben und Bläselungen, über Danziger und Crackled-Glas, Restaurationsglas, bis hin zu einfach bis mehrfach überfanger Glas, Mischglas, Streaky-Glas, Neu-Antik-Glas, Tischkathedral-Glas, echten Butzen und Dallglas.

Lamberts manufactures has manufactured glass by the traditional glass making methods with a distinct variety, quality and brilliance for more than 70 years.

The product range goes from mouth-blown genuine antique glass in different colors and bubbles (seedy), Danzig glass, crackled glass, restoration glass, to simple to several times flashed glass, mixing glass, streaky glass, new antique glass, sheet cathedral glass, genuine roundels and Dall glass.

Lamberts Streaky-Gläser spiegeln die jahrhundertealte Kunst des Glasmachens wider. Jede Tafel besitzt einen eigenen Charakter - keine gleicht der anderen.

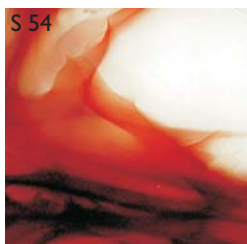

Bitte beachten Sie, dass die gedruckten Abbildungen die Realität nur andeuten können und jede Tafel ein wenig abweichend ausfallen kann, da es sich um echte Handarbeit handelt.

Lamberts of Streaky glasses reflect the centuries-old art of glass making. Each sheet possesses its own character - none resembles another.

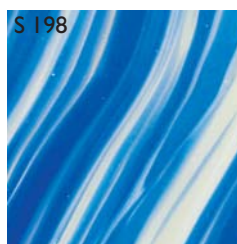

Please keep in mind that the printed illustrations can only suggest the actual appearance and that each sheet differs slightly from the others since they are genuine works made by hand.

Notes on the Care and Handling of Dichroic Glass:

The coating on Dichroic glass is vulnerable to scratches and damage from solvents, oils, adhesives, and fluxes. Therefore, the glass should be handled carefully and protected from abrasions. When necessary, Dichroic glass can be cleaned using mild soap and water or a mild glass cleaner and dried with a soft cloth.

Leaded Glass Application

When fabricating a panel designed to include Dichroic glass, use a cutter without oil, and score the glass on the uncoated side. The coating can be protected from soldering and grouting phases by covering it with low tack tape or contact paper that is easily removed when finished (be sure to test first with a small scrap piece of glass).

Lamination Application

Some Dichroic jewels and bevels are made by laminating the clear bevel to a coated sheet of thin float glass. This process layers the coating between the glass and the jewel, and thus it is protected from the dangers listed above.

Fused Glass Application

Fusing Dichroic glass not only produces captivating effects, it eliminates all the vulnerabilities listed above as well. The fusing process molecularly binds the glass and the coating materials. Reflective colors difficult to perceive on clear glass will intensify when fused onto a background of black glass. Clear glass offers versatility as it can be fused with Dichroic coating either up or down. When fused Dichroic side down, the coating will be encased in a layer of clear. When fused Dichroic side up, a soft metallic effect is achieved.

Anmerkungen zum Umgang und zur Behandlung des Dichroic Glases:

Die Schicht auf Dichroic Glas ist anfällig für Kratzer und für die Beschädigung durch Lösungsmitteln, Öle, Kleber und Flussmittel. Folglich sollte das Glas sorgfältig angefasst werden und vor Abnutzungen geschützt werden. Falls notwendig kann Dichroic Glas mit milder Seife und Wasser oder einem milden Glasreinigungsmittel gesäubert werden und mit einem weichen Tuch getrocknet werden.

Bei Arbeiten mit Dichroic Glas, benutzen Sie bitte einen Glasschneider ohne Öl, und schneiden Sie das Glas auf der unbeschichteten Seite. Die Schicht kann vor den lötenden und überziehenden Phasen geschützt werden, indem man es mit dünnen Klebeband oder Kontaktpapier bedeckt, das leicht entfernt werden kann, wenn es fertig gestellt ist. (Vor der Entfernung an einem kleinen Reststück Glas prüfen).

Einige Dichroic-Muggelsteine und Facetten werden hergestellt, indem man die klare Facette mit einer überzogenen Schicht des dünnen Floatglases laminiert. Dieser Prozeß überlagert die Schicht zwischen dem Glas und dem Muggelstein, und wird folglich vor den Gefahren geschützt, die oben beschrieben werden.

Das Fusen von Dichroic Glas produziert nicht nur faszinierende Effekte, es beseitigt auch die ganzen Anfälligkeiten, die oben beschrieben werden. Der Fusingprozeß bindet molekular das Glas und die beschichteten Materialien. Die reflektierenden Farben, die schwierig auf freiem Glas wahrzunehmen sind verstärkt, wenn sie auf einen Hintergrund von schwarzen Glas fixiert werden. Klares Glas bietet eine vielseitige Verwendbarkeit, weil es mit der Dichroic Schicht entweder oben oder unten geschmolzen werden kann. Wenn die Dichroic Seite unten geschmolzen ist, wird die Beschichtung in einer Schicht von klaren Glas eingehüllt. Wenn die Dichroic Seite oben fixiert ist, wird ein weicher metallischer Effekt erreicht.

Wichtige Information für die
Verarbeitung von Dichroic
Gläsern

Beim Verschmelzen von
identischen Dichroic Gläsern kann
es zu Farbabweichungen im
Endprodukt kommen.

Important information for
working with dichroic glass:

When fusing identical dichroic
glasses, color deviations can occur
in the final product.

Was ist Dichroic Glas :

Dichroic ist eine high-tech optische Schicht, die selektiv bestimmte Wellenlängen (Farben) des Lichtes reflektiert und die restlichen Wellenlängen durchlassen läßt. Dieser gleiche Effekt wird in der Natur in Pfaufedern und Opalen gesehen. Das Wort "Dichroic" bedeutet zwei Farben, welches sich auf die übertragene Farbe und reflektierte Farbe bezieht. Der beschichtende Prozeß erfolgt in einem hohen Vakuumraum, der einige Spezialgeräte als Ausrüstung hat um den beschichtenden Prozess zu steuern und zu überwachen.

What is Dichroic Glass:

Dichroic is a high-tech optical coating that selectively reflects certain wavelengths (colors) of light and allows the remaining wavelengths to transmit through. This same effect is seen in nature in peacock feathers and opals. The word "dichroic" means two colors, which refers to transmitted color and reflected color. The coating process is done in a high vacuum chamber that has several pieces of specialized equipment to control and monitor the coating process.

Da der Charakter des Dichroic-Glases der Wechsel ist, ist es nahezu unmöglich diese Gläser farblich im Katalog abzubilden. Um Ihnen das Prinzip des Glases zu demonstrieren haben wir in einer Bilderfolge ein Glas in verschiedenen Winkeln fotografiert. Wie Sie sehen, könnte jedes Foto auch für ein anderes Glas stehen. Dichroic-Gläser sollten Sie niemals in einer Serie einsetzen wo ein Stück wie das andere sein soll. Dichroic-Gläser sollten Sie immer wie ein Stück Einmaligkeit einsetzen.

The character of dichroic glass is its changeability, which means that it is nearly impossible to illustrate this product on a color catalog page. To demonstrate the principle of dichroic glass, we have taken a series of photos viewed from various angles. As you see, each Foto could be the image of a totally different glass. Dichroic glass should not be used for a series where one piece is to resemble the next. Dichroic glass should always used to represent a piece of uniqueness.

DECO-FLOAT ist ein 2 mm Float-Glas mit einer einseitigen Farbbeschichtung (AK85). Die Farbseite kann vor oder nach dem Fusing abgestrahlt oder graviert werden. Das Glas muß auf der unbeschichteten Seite geschnitten werden. Nicht mit starken Chemikalien wie z.B. Essig reinigen, nur normalen Glasreiniger verwenden. Nach dem Fusen kann sich die ursprüngliche Farbe verändern.

DECO-FLOAT is 2 mm float glass with a color layer on one surface (COE85). The color layer can be sandblasted or engraved before or after fusing. The glass must be cut by scoring the surface opposite the color layer. Do not clean with harsh chemicals such as vinegar, use only normal glass cleaners. The original color can change after fusing.

Glasmaß/Messurement: ca. 60 x 80 cm

Die Anlauffarben (Striker) erreichen ihre Zielfarbe nach dem Schmelzen. Die obere Abbildung zeigt das Glas vor dem Schmelzen.

The strikers reach their target color after firing and look like this before firing.

BULLSEYE Billets

Billets
Maß : ca. 12,5 x 25 x 1,9 cm
Gewicht : ca. 1,6 kg

Each billet is approximately (12,5 x 25 x 1,9) 5" x 10" x 3/4" and weighs about 1,6 kg

Drei hintereinander gestellte Billets demonstrieren die Ausweitung der Farbsättigung anhand der Stärke.

Three stacked billets demonstrate the increase in color saturation with thickness.

NEU / NEW

Dekoration für Ganzglastüren und sonstige Sicherheitsgläser.

Neu im Programm sind die Echtglasapplikationen in verschiedenen Farben und Formen. Die Applikas sind mit Gläsern des Systems 96 hergestellt. Auf Sicherheitsglas können die Applikas mit UV-Kleber sicher verklebt werden. Falls gewünscht können diese anschließend mit einem selbstklebenden Bleiband eingefasst werden. (Art.-Nr. 42 280 xx siehe Werkzeug Katalog)
Applikas lassen sich auch mit anderen Gläsern aus dem Bereich 96 verschmelzen.

Decorations for glass doors and other safety glass panes.

Applikas genuine glass applications in various colors and shapes. The applikas are manufactured from system 96 glass. The applikas are glued to the safety glass on the doors. If desired you can decorate the Applikats with self adhesive lead. (Item.-No. 42 280 xx look in the tool catalog)
Applikas can also be fused with other panes of the 96 range.

Friesecken sind aus hochwertigem mundgeblasenem Überfangglas hergestellt. Das Muster ist mehrstufig eingeschliffen und teilweise poliert.

Fries squares are made of high quality mouthblown glass. The designs are engraved in different layers and partially polished.

DEKOR GLAS

Speziell für die Laserinnengravur führen wir ein umfangreiches Programm an Glasblöcken in einer optischen BK-9 Qualität. Selbstverständlich können wir Ihnen auch auf Wunsch ein spezielles Glas anfertigen lassen.

Especially for internal laser engraving we offer different glasses in optical BK-9 quality
